

NEW!

AEROCUT CONTROLLER (LAN)

- Connect directly to the AeroCut controller system User Interface with Intellicut software's LAN connection.
- All AeroCut interface settings can be updated and saved remotely.

AEROCUT PRESET TEMPLATE MANAGER

- Instantly produce print files for over 250 preset templates with full barcode support.

SMART LAYOUT ASSISTANT™

- Create AeroCut manuset custom templates with guaranteed AeroCut compatibility.
- Send custom generated manuset template settings directly to the networked AeroCut.
- Manage your AeroCut's template library from your networked PC.

POSTAL MAILING

- Merge addresses onto any AeroCut layout
- Intelligent Mail Barcode creation
- Automatic line ordering to retain data sorting for sheetfed AeroCut cutter

ADVANCED IMPOSITION FEATURES

- Multi-page PDF splitting, imposition and ordering
- Easy imposition layout adjustment with AeroCut compatibility protection
- Toggle advanced imposition project settings such as record repeat and record direction

Bundled with AeroCut X and AeroCut X-Pro.

Cutting edge imposition and template management software integrated with the AeroCut

Design, Print and Finish Seamlessly

Intellicut is a groundbreaking approach to efficiently operate and manage your slitter/cutter/creaser document workflow. Easily impose artwork + address data to seamlessly create PDF layouts with job barcodes and cut marks for the AeroCut. Increase your shop's productivity with Intellicut to program and manage your AeroCut template library from any networked PC. Take control of your entire print and finishing workflow process with the Intellicut Software!

New! Intellicut Controller allows direct connection to the AeroCut System User Interface so you can update AeroCut settings from your PC.

Template Based Barcode System

Over 250 Preset templates are available with your AeroCut and Intellicut generates perfectly imposed PDFs with template **barcodes**. Have a custom job? Create a template once that automatically saves in both your Intellicut library and in the AeroCut manuset library with your unique **barcode**. All you need to do is select the template, add artwork, print and cut!

AeroCut Smart

The Intellicut imposition tool uses Lytrod's proprietary **Smart Layout Assistant** technology. Select paper size, cut size, bleed edge and let the **Smart Layout Assistant** do the work for you, determining the perfect layout that will meet all AeroCut requirements. Download the template with one mouse click to your AeroCut. Save time and money by ensuring any layout you create will work seamlessly on the AeroCut.

Create Flexible Layouts

Create AeroCut Flexmode cuts, creases, perfs, x-perfs and jump perfs over your design imagery. Preview all cut, crease and perf lines for finishing accuracy. Intellicut generates Flexmode template settings and creates a custom barcode. These are sent directly to the AeroCut through your LAN.

Automatically Program Your AeroCut!

Intellicut directly connects the imposition design process with programming of the AeroCut Slitter/Cutter/Creaser. Use Intellicut to create AeroCut compatible design layouts and compose barcode ready PDF print files with your artwork. That's it! Intellicut will send the exact cut, crease and perforation settings to the AeroCut through your office network connection, allowing your operators to pick up their print and put it right into the AeroCut. The AeroCut reads the barcode and automatically adjusts the machine to create perfectly finished pieces!

Step 1: Use Intellicut's Smart Layout Assistant to automatically create an AeroCut compatible layout, then add artwork to create your print-ready PDF with the AeroCut barcode.

Step 2: Send the Print Ready PDF created by Intellicut to your printer, these will be perfectly imposed and will include an AeroCut barcode.

Intellicut can download the document layout template created by Smart Layout Assistant directly to your AeroCut through your office network.

Step 3: Place your printed output on the AeroCut. It automatically reads the barcode, adjusts the machine precisely and cuts! Even if page layouts change, the AeroCut adjusts on-the-fly.
